Reasons for Allowance

1. Claims 1 and 3-26 are allowed.
2. The following is an examiner's statement of reasons for allowance.

Referring to claim 1, the prior art does not teach or reasonably suggest circuitry for preventing the source of the matched protocol-defined information packet from putting further protocol-defined information packets onto said interconnect and transferring the portion of the matched protocol-defined information packet to a debug module for analysis.

Referring to claim 16, the prior art does not teach or reasonably suggest circuitry for preventing the source of the matched portion of the protocol-defined information packet from putting further information onto said interconnect when it is determined that the protocol-defined information packet on the interconnect matches said one or more conditions and circuitry for communicating the portion of the matched protocol-defined information packet to a debug module on the interconnect for debugging.

Referring to claim 24, the prior art does not teach or reasonably suggest, in combination with the remaining limitations, an arbiter for determining which module is permitted to put protocol-defined information packets onto the interconnect and circuitry for preventing a module from putting further protocol-defined information packets onto said interconnect, said preventing circuitry preventing a module from winning an arbitration carried out by said arbiter.

Referring to claim 25, the prior art does not teach or reasonably suggest preventing the source of the information determined to satisfy one or more conditions

from putting additional protocol-defined information packets onto an interconnect and arbitrating access to said interconnect between said modules allowing one or more of the request or response packets to be placed on the interconnect at the same time.

Referring to claim 26, the prior art does not teach or reasonably suggest circuitry for preventing a module from putting further protocol-defined information packets onto said interconnect when it is determined that information on the interconnect matches said one or more conditions and arbitrating between said modules for access to said interconnect allowing one or more of the request or response packets to be placed on the interconnect at the same time.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael C. Maskulinski whose telephone number is 571-272-3649. The examiner can normally be reached on M-F 9:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Beausoliel can be reached on 571-272-3645. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
